WHAT IS A VIRTUAL CONFERENCE ROOM?

- When you plan a meeting, you reserve a conference room.
- When you plan a virtual meeting with [WebConference.com™](http://WebConference.com), you reserve a **virtual conference room**.

show to a web
audience

HOW DO I RESERVE VIRTUAL CONFERENCE ROOM?

Planning ahead, you make sure to secure a room that's the appropriate size for the number of guests you are including.

Proofread
detailed forms
through document
collaboration

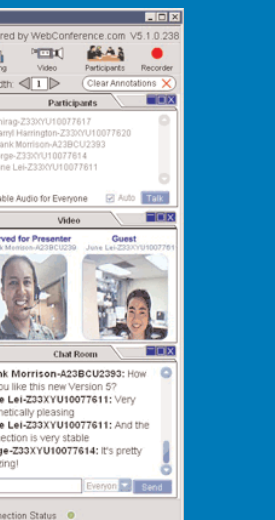

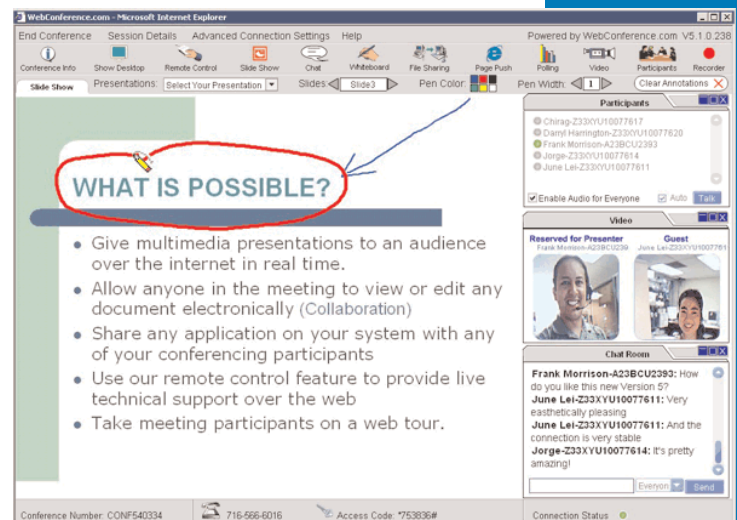

With [WebConference.com™](http://WebConference.com), you can order a virtual meeting room for...

- \$49/month (+\$29 set-up fee) for you and 1 guest
 - \$74/month (+\$29 set-up fee) for you and 2 guests
 - \$99/month (+\$29 set-up fee) for you and 3 guests
- ...Anything above that is \$25 per each extra guest per conference.

WHAT THE CONFERENCE LOOKS LIKE

When you are gathered for a meeting in a physical conference room, you and your guests may sit around a table facing each other, working from individual laptops, listening to a presentation or training.

With [WebConference.com™](http://WebConference.com)'s virtual conference room, you can be in the same "room" and still in the office space you're comfortable with - no complicated hook ups, no baggage or heavy carrying case to lug around - and yet, you each have your PC in front of you so you can all work together. Facing each other...if each of you has a web camera, you can do just that - virtually. Up to 10 people can appear on the screen at the same time so that it creates an in-person feel - just like gathering around a table. Work in much greater comfort without the travel expenses.

VIRTUAL "AV EQUIPMENT"

Often for "real" meetings, you must order audio visual equipment well in advance for impressive presentations, but with WebConference.com™, everything you need is automatically included:

- Our Conference Player Window compares to an overhead projector for displaying and annotating documents and applications.
- Our Whiteboard feature is comparable to a dry-erase board for instructing, illustrating, and note-taking.
- Our Slide Show feature compares to slide projectors and screens for running Power Point presentations.
- Our Desktop Sharing, Page Push and Movie features compare to video and DVD players for showing film video clips and other documents.
- Our File-Share feature compares to an instant fax - instantly download your colleague's document onto your desktop.

ORGANIZED MEETINGS AT A DISTANCE

In actual meetings, a presenter may find it challenging to keep a group focused to come to a consensus quickly and efficiently.

In a WebConference.com™ virtual meeting, there are several ways to optimize productivity and order.

- The polling feature expedites group decision-making in an organized fashion.
- The chat feature allows your guests to ask questions without interrupting the speaker or the meeting's flow. It's like raising a hand.
- The chat feature allows the presenter and guests to ask and answer private questions to individuals. The presenter may also opt to block this function.
- The presenter can disallow audio to a disruptive member of the room (or allow audio to anyone who hasn't spoken).
- The presenter can allow or disallow any guest control of editing the application in use.
- The presenter can promote a guest to become the presenter, and then regain presenter status again at anytime.
- The presenter can terminate a disruptive member from the conference.

BEGINNERS GUIDE TO WEBCONFERENCE.COM™

HERE'S A FEW EXAMPLES....

Making any changes to your company's systems or processes can often cause significant disruption in your organization. Minimize risk by using [WebConference.com™](http://WebConference.com) to effectively roll out systems changes to your company. In addition, with recorded sessions viewable any time, those employees who couldn't make the live session will not be left out. Annotation tools allow you to highlight key points. Increase training staff productivity by enabling multiple trainers to collaboratively train from different locations.

With [WebConference.com™](http://WebConference.com), sales organizations have the tools necessary to both increase the number of qualified opportunities and shorten the average sales cycle, making more time available to spend actually selling. The result is greater quota attainment and unprecedented sales growth. Sales managers will find that rich interactive presentations to prospects are a snap with [WebConference.com™](http://WebConference.com). In addition, increase the impact of your emails with personalized multimedia presentations viewable by the prospect at their convenience.

BEGINNERS GUIDE TO WEBCONFERENCE.COM™
